

## VCO.wvavrs.tv

Voice Carry-Over, like VRS, allows deaf and hard-of-hearing individuals to make and receive telephone calls to/from any hearing person. With VCO, the deaf or hard-of-hearing person can speak directly to the hearing caller. Using a real-time connection with a video interpreter through video phone or pc, you're able to use your own voice.

## spanish.wvavrs.tv

The language barrier is no longer an obstacle. A deaf or hard of hearing person can communicate with a hearing Spanish speaker. With Spanish VRS, a video interpreter will translate between sign and spoken Spanish.

## vMeeting

Imagine being able to participate in a business conference call or even hold a board meeting without having to travel! You can have a family conference call to plan a family vacation or even meet with all of your child's teachers at one time.

For more information about setting up a vMeeting for you or your organization, email Shannon Odneal at [sodneal@csdvrs.com](mailto:sodneal@csdvrs.com) and we will assist you.

## personal 800 number

With CSDVRS video mail, you won't miss a call. When you receive a telephone call to your personal 800 number, and you're not available to take the call, the video interpreter will record a signed video mail message and send it to your email!
